Market More Quiet After Early Bulge When More March Shorts Squeezed,

Tuesday Afternoon, March T Anxiety of shorts in March ov-Anxiety of shorts in March obshadowed all else in the market today
and the sharp buige in that position
had effect on the entire list. In New
York that option reached 45.18c, a rise
of 148 points over last night's coose
and 278 over yesterday's lowest. Apparently the congested situation was
relieved to a great extent by the
tise and some attention was given
other influences after the subsidence
of anxiety. May and July shared in
the strength and went sharply higher,
for shorts therein evidently saw well
defined warning to themselves in the
action in March, for there is really no
chance whatever for them to avoid-simliar punishment if the holders of Ine
long ends of these contracts do not
allow them to cover before such levels
are reached. The new crop positions
went higher also, although the chief
incentive was probably the large discounts, for the weather in the belt is

improving and many observers think the trade is on the eve of having maye favorable accounts as to the start for the crop.

The reaction which followed the extreme rise was not suggestive of any material relief for the sherts, though it was regarded as healthy and largely based on zechnical grounds.

Liverpool was rather tame and finished quiet at an advance of five points to a decline of the same amount, although in early trading it was nearer to expectations. The news from Germany continued the source of anxiety for the extreme elements over there are making too much headway to encourage optimism. Manchester was credited with doing some liquidating in late trading. Spots were marked up 28 points, fully middling to 29.97d, with saless 4,000 bales, including 2,900 American. Becelptis for the day were 16,000 bales, including 5,400 American. Manchester advised that cloths were firm, but yarn business was very much restricted.

When the market opened March in New York was sharply higher, first sales being at 42.56c to 42.56c, which helped to puil the other positions upward. But little news was at hand and the /chief factor was the unfortunate position of the belated shorts. Sterling rates were slightly better, but had an offset in the character of the German news and advices of tightening money conditions in this country. came renewed support, but it was better in the old than the new crop post, tions.

Private reports told of some light rains in portions of Texas, regarded as favorable, while indications were for some here, with the central and eastern belt promised generally fair.

From the spot department came little that was new. The bulge in futures has not helped business any, but on the other hund has made it worse, without any infaterial effect on the price obtainable for the raw material. The inability of buyers to hedge has simply sounded the death knell for the time being on new business, which causes the holder of the numerous low grades to be compelled to wait.

New Orleans closed 25 points up to 38 down, tone steady. Spots were reduced 25 points, middling to 40.70 and sales 3.983 hates.

In the local market sales reported were 2.500 bales, and quotations were unchanged, middling at 40.50c.

\*\*EW YORK, March 23.—The feature in today's early cotton market was the continued advance in March contracts. One notice was reported in circulation, and there were only a few buyers, but the position seemed to be entirely in control of the remaining long interest, and after opening 125 points higher, the price was quickly marked up to 43.10 or 140 points net higher.
